

Opportunity intake sheet CAPTURED FROM COMMBUYS

Stage 1 · A buyer posts. Everything on this sheet was read from the public posting the day it appeared.

BID NUMBER BD-26-1217-MAP02-MAP02-121989	BUYER Metropolitan Area Planning Council	CONTRACT VEH122, categories 1 and 4	FIT VERDICT Consider
POSTED October 27, 2025	CLOSES December 15, 2025, 5:00 PM (moved from Nov 24)	CEILING \$660,000 · no site above \$110,000	SITES 6 municipal partners

What the buyer asked for

Non-grid-tied charging equipment and services, coupled with EV carshare, at sites in Framingham, Quincy, Natick and the housing authorities of Boston, Chelsea and Somerville. A pilot funded by a MassCEC ACT4All grant. Open to Statewide Contract VEH122 vendors in categories 1 and 4.

Required response, as posted

TAB	CONTENT	HARD RULE
1	Cover letter and Section 11 forms	13 signed forms, exact order
2	Minimum Quality Requirements Form	One non-affirmative answer rejects the proposal
3	Experience and qualifications	5 pages; resumes as appendix
4	Scope of services, approach, equipment	Per site
5	Technical specifications and warranties	
6	References	At least 3; one non-grid-tied, one carshare; called at random
7	Price proposal	Appendix D template; one price per site; narrative 5 pages max

Why this verdict

- Asks for non-grid-tied charging, which is the product. Explicitly open to categories 1 and 4.
- Requires a joint venture with an EV carshare operator and a carshare reference, which Suryatech does not hold.
- Seven-tab response with thirteen signed forms: weeks of assembly, about 80 hours.

Chase only with a carshare partner on the team. Without one, Tab 2 fails on the operator requirement and the whole proposal is rejected before it is read.

Amendment log

Every change the buyer posted while the request was open. Re-read daily by the watcher.

DATE	KIND	WHAT CHANGED
2025-10-27	File replaced	RFP FINAL, corrected, replaces the original file
2025-11-06	Q and A	Bidders conference held; video and slide deck posted
